Mobile Employee Experience

What is the Mobile Employee Experience?

The Mobile Employee Experience connects your mobile employee to the heart of their move, empowering them to take control of their move through an intuitive and easy-to-use portal. Accessible via a mobile app, the Mobile Employee Experience provides all the answers mobile employees need.

How does it work?

Secure, encrypted and accessible using any mobile device, the Mobile Employee Experience provides 24x7 access to all data, information and expertises required for a successful move. There's no need to log in to multiple systems, so your assignees can complete tasks quickly. Through push notifications, automated alerts and in-app messaging, the entire project team can interact as needed, all through a single tool. The Mobile Employee Experience utilizes the Equus Ecosystem, a powerful platform that integrates the multiple vendors who assist the employee with their move, directly with the AssignmentPro platform for timely updates and communication of information.

Why do I need it?

By providing your employees with the information they need, Global Mobility teams are less burdened with time consuming, administrative tasks. Through push notifications, automated alerts and in-app messaging, mobility coordinators can communicate and interact with their mobile employees – all from one system - enabling them to respond quickly and deliver superior customer service. At the same time, the Mobile Employee Experience eliminates stress from mobile employees by providing one tool to track and manage their move, allowing them to focus on the success of their assignment. Now, mobile employees get support they deserve, while global mobility teams get the data and insight needed to manage your program effectively.
