EQUUS PinPoint

Business Travelers & Posted Workers

IDENTIFY > TRACK > MANAGE

PinPoint is an intuitive, web-based app that enables you to:
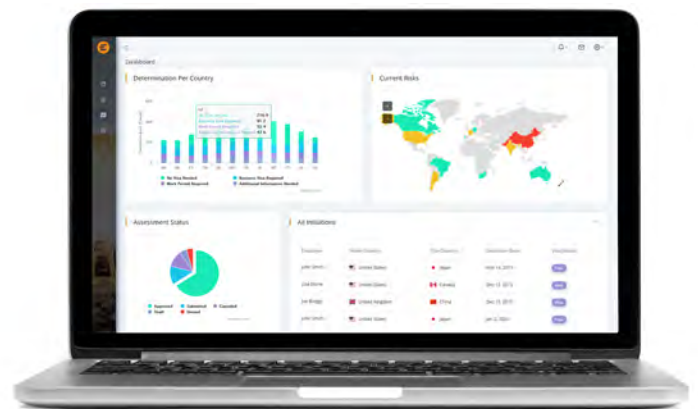

- Identify business travelers and posted workers
- Track business travelers, flag tax and immigration risk and initiate compliance
- Manage posted worker data collection, registration and at-post tracking

Automatic Identification

PinPoint automatically tracks employee travel through integration with travel, expense, security or time tracking systems.

Once an employee meets a tax, social security, immigration or posted worker threshold, PinPoint creates a case, generates tasks, and notifies stakeholders.

Employees can also be given the chance to confirm, amend, or add to their travel information in the PinPoint app.

Risk and Process Management

Triggers can be set to flag employee travel based on your risk appetite and internal rules.
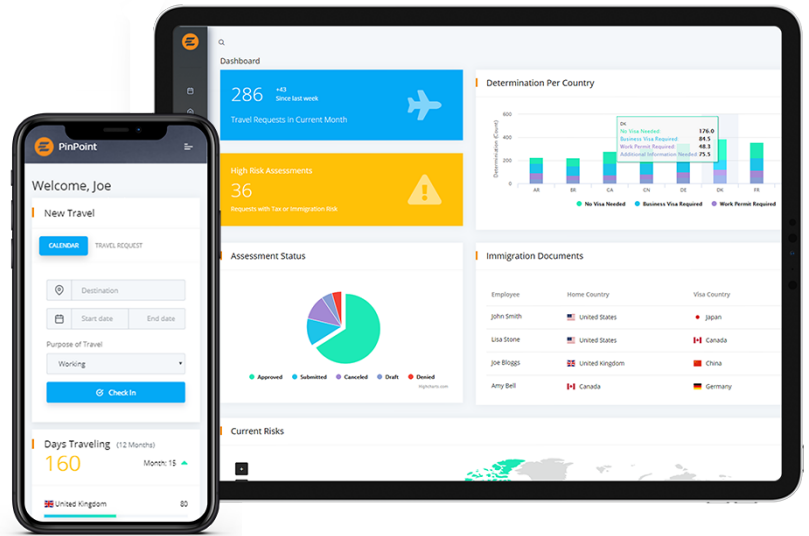

Triggers can warn employees of any future travel risks (e.g. triggering a visa requirement) or notifying managers that tax or posted worker compliance is required.

PinPoint's process management automates creation of task lists and allocation to users. Single use links allow for secure and easy data uploads , streamlining data collection processes.

PinPoint makes it easy to identify, track, and manage business travelers and posted workers.

Dynamic dashboards and powerful reporting helps businesses understand and communicate risk and compliance.

Easy data collection, customization of triggers, tasks and notifications mean that PinPoint can add value to any business.

Automatic Identification

Identify employees who need tracking or posted worker registration through automated feeds from your travel, expense and security systems.

Task Management

Automated tasks guide users through what they need to do. Notifications and dashboards flag risks and issues.

Threshold Triggers

Create thresholds for notifications and tasks, to trigger per your risk appetite and internal process.

Downstream Delivery

Initiate vendors, create merge documents and send reports to payroll.

Understand Your Data

Dynamic dashboards that visualize risks and issues, along with on-demand reporting to help you stay in control.

Easily Collect Data

Collect data from multiple sources by providing single use links to allow users to upload quickly and securely.

ABOUT EQUUS

Equus Software is the global leader in cloud-based international relocation and mobility solutions. More than 300 organizations around the world rely on Equus tools and technology to automate mundane, transactional work so that global mobility teams, talent management professionals and other key stakeholders can focus on adding value to the business. Founded in 1999, Equus has a proven track record for delivering cutting-edge talent mobility solutions, continuous innovation and exceptional customer service.
