

# Equus Ecosystem

## What is it?

The Equus Ecosystem is an integration hub that connects all your global mobility data and vendor systems in the Equus Platform to transform how you manage your mobile workforce. It enables you to securely initiate services, receive service updates, and share real-time milestones with your mobile workforce seamlessly – all from a single system.

By integrating all your global mobility services and data, the Equus Ecosystem creates a highly collaborative partner network that delivers a cohesive, high-performing, and data-driven mobility experience for your mobility team, vendors, business partners and employees.

## How does it work?

Clients can connect their vendor systems with the Equus Ecosystem to enable a bidirectional API integration of employee, relocation, and service-related information and documents. By centralizing critical mobility data through the Equus Ecosystem it enables mobility teams, vendors, and key stakeholders to track, initiate, and manage mobility services easier, faster, and with more accuracy.

The Equus Ecosystem keeps employee information safe with its secure and encrypted RESTful API gateway that ensures the confidentiality and privacy of global employee data.

# Integrated Services

Equus continually expands its integrations to provide clients with a market leading, connected ecosystem.

## Integrated services include:

- |                      |                      |
|----------------------|----------------------|
| Move Management      | Tax                  |
| Immigration          | Destination Services |
| Temp Living          | Payroll & HR         |
| Orientation Training | Global Mobility Data |

## What are the benefits?

 **Real-time Data Insights:** Gain instant access to critical data, allowing for informed decision-making, compliance monitoring, and strategic planning.

 **Streamlined Processes:** Automate administrative tasks to optimize efficiencies and minimize errors. This allows your team to focus on strategic initiatives.

 **Improved Vendor Management:** Integrate vendor processes and data, providing them direct access to employee-related information for improved service quality.

 **Enhanced Security and Data Protection:** Safeguard data with a secure and encrypted gateway managed in Microsoft Azure and ISO27001 certified to ensure compliance with global data protection regulations.

 **Exceptional Employee Experience:** Empower your mobile workforce with a user-friendly portal, providing access to vital information, document submission, and real-time updates from any device, anywhere.
